

Asterisk Fireman Top Boots

Amongst the products which COSEM has marketed, under its registered product brand name Asterisk, includes fireman top boots.

The material used to manufacture the Asterisk topboots has undergone extensive tests to conform to the physical and chemical requirements of test standard DIN EN 345 test method or equivalent International Test Standards. It is very suitable for daily activities of an emergency responder such as fire fighting and rescue operation as well as any other indoor and outdoor activities.

These top boots are very comfortable to wear as they have inner lining which are breathable. The boot vamp is also made of best quality and water resistant leather.
